

Entry Edition Photo ID System

Polaroid's Entry Edition Photo ID System is ideal for small business, day care centers and other organizations requiring a very affordable, easy to use all inclusive system to create photo ID Cards in house. The Entry system allows creation of single or dual sided photo ID cards, and can utilize bar codes, and be upgraded to allow for magnetic stripe encoding and other advanced features as needed.

ID Card Maker Entry Edition Software includes standard card templates or enables you to develop your own card designs whether you require color or B&W cards, and allows you to use customized graphics to create your own unique design. This software also includes a comprehensive on-line help guide to make it very easy to implement your own ID card program.

Polaroid's ID Card Maker Software has been developed in conjunction with our ID card printers for seamless integration as well as allowing for an easy upgrade path as your software or printer requirements change for a more advanced photo ID card program.

The Entry Edition Photo ID Card System includes everything you will need to implement your in-house ID card program. This system includes: ID Card Maker Entry Edition Software, a P3000 Photo ID Card Printer (USB), high quality Webcam, 1 X 250 image count color ribbon and 250 PVC .30 mil blank cards.
